

AFTERNOON'S ACTIVITIES

Italian Language and Culture

We have always believed that social and cultural activities play an important role in language learning. The desire to learn about the society and culture of the country is a strong motivation to improve language skills. Most students find it interesting to compare their own culture with Italian culture and enjoy increasing their knowledge of the country which in turn allows them to better use the language.

For this reason, each Koine' school offers a varied programme of teacher - led social and cultural activities in the afternoon including effective insights into the Italian way of life

The programme is individually designed for each Koine' location based on the particular environment and characteristics that make each location unique.

The teaching staff run the activities dealing effectively with any language difficulties through the use of video, DVD, etc.

The activities are designed to be attended by students at all levels and, depending on their level, students are able to understand the content to a greater or lesser extent. The activities are a valuable opportunity for exposure to the language and to the topics covered and are also interesting and entertaining in their own right. Many of the themes make interesting topics of conversation between students and with the teacher. The afternoon activities can be lectures, excursions or guided visits.
