

English Training & Internship Program

Internship Course length:

Actual internships are for a minimum of 8 weeks and a maximum of 12 weeks.

Program requirements:

- F-1 Visa (required)
- English Proficiency Level: TOEFL 450 or more, TOEIC 600 or more, or high intermediate level on ICC's English placement speaking and writing test (view ICC level description)

Practice your English language skills and gain work experience!

This intensive 8-12 week internship combines English language training with on-the-job exposure to American business practices. Students apply skills acquired in BEC (Business Certificate Course) or EC (English for Communication Program) classes. Interns are placed at a business or professional organization for 8-12 hrs/week. All positions are unpaid.

This program is designed to develop a student's English skills in an American workplace environment. Every effort is made to match students with their business area of interest; however we CANNOT guarantee placement in a certain company or industry.

Our Internship Program requires at least high intermediate level of English proficiency to begin the actual internship for 8-12 weeks. You can develop your English skills by taking any of the following programs that ICC Hawaii offers:

- 1) English for Communication Program (EC)
- 2) Business English Certificate Course (BEC)
- 3) TOEIC Preparation Program (TOEIC)

Internship program includes

Initial Placement counseling: Initial placement counseling includes meeting with a highly qualified coordinator to discuss placement options based on the student's skill set, background and experience.

Resume Development Assistance: Resume development assistance includes aid meetings in developing an exceptional English business resume, cover letter and reference letter.

Interview Preparation Counseling: Interview preparation counseling consists of meetings geared towards developing confident question and answer dialogue needed for American professional interviews

Completion Counseling: Completing counseling provides an opportunity for interns to discuss the overall quality of the program as well as gain insights into future professional options within the United States.
