TEACHING

An active and efficient teaching method to learn French
Maximum 9 students per class: that is the secret of a friendly atmosphere and efficient learning! Our method, based on the communicative aspect of the language, requires no textbooks, but rather provides a tailored sheet system created by the teachers which is adapted to the linguistic needs of the students. Without omitting written skills, we focus on oral communication and its use in every day life of the French. That is why our teaching material is centered on the living language aspect and enriched by numerous documents: songs, newspapers and magazine articles, videos, games, etc. Gathered around a table, students are encouraged to participate in an active way and with the assistance of presentations, role-plays and debates, to stimulate their creativity.
