Class description

In this block of classes students will learn all of the core grammar concepts necessary to improve their accuracy, fluency and competency level in English and French. This is an interactive class where students have an opportunity to use the grammar and learn about the rules through discovery, with the guidance of the teacher and some explicit explanations. More emphasis is placed on being able to communicate using the grammar point, which is why there are so many opportunities to practice and improve. Students will be able to practice the 4 language skills (listening, speaking, reading and writing) in an integrated setting. Class topics a wide variety of relevant subjects through different learning techniques that encourage communication in a real world environment. Students improve their language skills by using a course book as well as by participating in many varied activities to help them learn and progress.

This course practices core English functions and is structured around themes designed to improve natural everyday communication skills. The goal in this class is to develop fluency. There is a focus on speaking and interaction amongst students so that they can apply what they learned in their previous classes. The class is interactive and encourages team and group work in order to accomplish the goal of interacting like a native speaker and challenges students through tasks and project based activities such as role-plays, debates, discussion, story-telling, communicative or vocabulary games and mini projects.

This class will enhance your knowledge in specific language skills through various exercises and dynamic activities. Every session, there is a different focus, such as reading, writing, listening, speaking, vocabulary and expressions, including idioms, as well as pronunciation and task-based learning. There are different sections that are tailored for each level, from beginner to advanced. You can practice your writing skills by producing a school newspaper, or develop your listening abilities by exploring the world of radio and podcasts.

This class is designed to help you speed up your learning process while allowing you the opportunity to select courses based on your specific interests and needs. Every session we offer a different specialized English/French course with a specific theme or central focus, such as English/French in films and music. Because there tend to be fewer students in this class, there is more individualized attention from the teacher.

This is a class is for Bilingual students who study both languages (French in the morning and English in the afternoon). The class focus is on improving overall fluency in English by studying the four language skills as well as vocabulary and expressions to improve communication. As this is usually a smaller class, students will have more opportunities to work more closely with the teacher while focusing on specific language points.

| IELTS

The IELTS test preparation program is designed to help students prepare and study for the IELTS exam and to improve their skills in order to achieve a successful overall band score. This course is also for students who already have a high intermediate to advanced level (B1+) of English and are interested in studying and improving individual skills in the Academic and General component of the class.

During this 12-week course, students will be working to improve their band score for each language skills (reading, writing, listening and speaking) through textbook work, skills practice and simulation tests and any other resources the teacher will provide. Some students may not be preparing for the IELTS exam and simply want a more intensive study of the four language skills while improving their English overall.

| Pathway Programs

We have partnerships with the following schools and students can complete the required level with BLI and then be accepted to these schools. We have several other partners please contact us to find out.

BLI FLAP program is a comprehensive summer/winter program that offers you English or French classes during the morning, supplementing them with after school activities which are either social, cultural or sports activities. Participating in these activities will not only give you the opportunity to practice the language you are learning outside the classroom, but it will let you get familiarized with everything Montreal has to offer.

It is important that you always keep in mind that our main objective is for you to improve your language skills while you enjoy your time in the city. It is very important for you to remember that you are expected to meet the academic standards of the program. Attendance and punctuality to all classes, workshops and activities are extremely important for your success. There will be more information on this further on in this document.

While in the program, you will take classes and live with students who come from all over the world. It is very important that you respect and understand the different manners, cultures and habits that other students might have. Take into consideration that what might be normal for you might be something completely new for a student from a different country. This is a very enriching part of our program. Please, respect the others the same way you expect to be respected.

WE WANT TO MAKE SURE THAT AT THE END OF YOUR PROGRAM, YOU REACH YOUR MAIN OBJECTIVE; TO IMPROVE YOUR LANGUAGE SKILLS.
