

Intro

We wanted to create a special programme that the juniors can never have more fun while they are on the activities and also engage them with the activities. The idea is that through each cycle there will be an optional activity for a team that has to answer or take a photo while they are in activities. The closest group that gets the highest score wins a prize at the end of each cycle

Activities Timetable

Activities Cycle

CSL has created 2 Cycles to run the activities to avoid our students repeating the same activities while they are with us. Our afternoon Activities are aligned to include: Sports, Fun Adventure, History/Art Galleries, and Nature. This is designed this way to ensure that our activities fit everyone's interests.

Plan B Activities

Being in the country that rains on average 156.2 days a year, we have to be ready for that and therefore we have created a **Plan B** to avoid that. Activities that are highlighted in the previous table with orange and green are mainly outdoor activities and it will be changed according to the color decided by the activity coordinator.
