

## Activity Program at did deutsch-institut Hamburg

You can discover exceptional historical and architectural sights in the Hamburg harbor area, for example in the Old Warehouse district – the world’s largest connected storehouse complex. In the so-called Speicherstadt coffee, tea, cocoa and exotic spices have been stored for more than 100 years behind thick red brick walls. In SPICY’s, a spice museum – samples of these viands are offered as tasters. Next door the Hamburg Dungeon is awaiting your visit. There you can go back in times into the dark era of the black plague and witch hunting. After this spooky dip into Hamburg’s history we will finish off the excursion with a relaxing tour of Hamburg harbor in a tourist barge. Ship ahoy!
