

Sustainability Essentials

Course overview

Ages:	16+	English level:	Intermediate B1+	Starting Dates:	5th Feb, 27th May, 16th Sept 2024
Duration:	4 weeks	Academic info:	15 hours per week	Location:	London, Toronto, Dubai and Malta
				End of course certificate:	

Course description

This four-week Professional Certificate course explores the essentials of sustainability while enhancing your English language skills.

Week 1: Introduces sustainability's core concepts, emphasising its personal and professional relevance and covers the three sustainability pillars, Sustainable Development Goals, and practical sustainable living.

Week 2: Delves into Environmental Sustainability.

Week 3: Addresses Social Sustainability, focusing on social justice, human rights, community engagement, and responsible consumption.

Week 4: Economic Sustainability explores circular economy models, corporate responsibility, sustainable finance, and performance measurement, all within an English language context.

Each week will include class discussions, case studies, interactive activities, and individual exercises to put into practice the concepts learned. The course will also include recommended readings and resources for further learning.

What you'll learn

By the end of this course, you should be better able to:

- understand sustainability and its significance in both personal and professional life.
- explain and appreciate the three key pillars of sustainability - social, environmental, and economic aspects.
- recognise Sustainable Development Goals (SDGs) and their relevance to both businesses and society.
- understand sustainable lifestyles and how to take personal actions to promote sustainability.
- discuss topics such as climate change, sustainable resource management (water, energy, and waste), sustainable agriculture, and biodiversity conservation.
- understand and discuss issues related to social justice, human rights, community engagement, and responsible consumption and production.
- identify the circular economy, sustainable business models, corporate social responsibility, sustainable finance and investment, and how to measure and report sustainability performance.
