The Italian Language School in Florence

italianme is the innovative Italian language school for foreigners in Florence that offers a complete Italian experience, not only the study of the Italian language.

The school was officially founded in 2016, although the idea was conceived many years before in the minds of Carmen, Francesca and Nadia, the three founders, who are longtime friends and co-workers. It is the result of their decades of experience in teaching Italian language to foreign students, and the collaboration with an unparalleled group of teachers and partners: a team that represents the true soul of the school and welcomes with enthusiasm and professionalism people in love with Italy from all over the world.

It is located in the heart of Florence and nestled inside an old palace with all the amenities and technology of a modern setting, with expert teachers who will lead you with passion and enthusiasm to the discovery of the city and its nearby surroundings.

You will be independent, living in Florence just like a native Italian, because we believe that **learning a new language is gaining a new identity.**

We reinvent the experience of learning Italian, in Italy and online

italianme constantly reinvent the experience of learning Italian because learning a language is not just a goal to reach, but a path to build together. So the Italian lessons are tailored to the students' real needs for developing Italian speaking skills, communicating with Italians, learning Italian to study at the University, to survive, live and work in Italy.

Our students are the protagonists of the learning path. The goal is to accompany them to discover the Italian language in a natural and pleasant way. The greatest success comes when students tell us that while speaking the Italian language they discover a new part of themselves and day by day the language becomes familiar. The teaching method derives from the most modern theories that emphasize skills in communication. Groups are small; we guarantee a maximum of 8 students.

In addition to the textbook, audiovisual materials are used and the lesson is always supported by the most modern technologies to make the interaction between students and teacher dynamic and the environment friendly and relaxing. Last, but not least, to support the work to be done at home, every day students receive an email in which they find all the lesson developed in the classroom, and they can use the audiovisual materials of the textbook provided by the school.
