About us

We are a foreign language learning center where up to 10 languages are taught. We started operating in 2018 with minimal resources.

Although we are only 4 years old, we can say with pride that we have developed quickly

At this stage, our training center has 400 students, 3 branches and 20 employees per quarter. Since its establishment, we have been actively working on improving the quality of teaching, introducing modern methods and creating various manuals.

Our mission is:

Creating a comfortable and interesting environment for those who want to learn foreign languages by using modern standards teaching methods, which ensures the desired result in the shortest possible time and gives them new opportunities for self-realization.

Our values are:

- continuous development;
- corporate/social responsibility;
- teamwork and mutual respect;
- reliability.

Why us?

we offer:

- A program tailored to anyone of any age;
- Competitive tuition fees;
- Get an effective result in a minimum of time (one level study in 3 months);
- Safe, comfortable and friendly environment;
- Upon completion of the course a Level Certificate will be issued.

Our team is staffed by experienced and qualified teachers. We provide the highest quality training through highly qualified staff.

DIRECT METHOD

In our center, we teach using the Direct method - of Teaching approved in Europe (Direct Method), which means teaching with a method developed by the Direct Language Lab. At this stage, all languages are taught directly, except Arabic and Georgian.

- Fast, efficient and result oriented;
- Minimized homework;
- The lesson is tailored to the development of practical / conversational skills;
- 80% of the lesson process takes place in dialogue mode.

This method was especially interesting and effective for children because:

- Lessons are planned so that they can learn through play, singing, and a variety of fun activities;
- They do not have boring homework and a sense of obligation, therefore the learning process is much more active and brings happiness;
- Children learn the most commonly used words and phrases;
- We speak only the target language they are learning.

Our courses:

- General English language course;
- English language course for children;
- English language course for entrants;
- Georgian language course for foreign speakers;
- Georgian language course for entrants;
- General course of the German language;
- Arabic language course;
- Chinese language course;
- General course of the Russian language;
- Russian language course for children;
- General Spanish language course.

Our partners:

Georgian language course

Elene Kavtaradze

Georgian language teacher for non-Georgian speakers

Georgian language program was developed by the Language Laboratory specifically for foreigners. It is built around question-and-answer mode, with simple and flexible grammar activities and is tailored to develop speaking skills.

Social responsibilities

Language Laboratory has felt a sense of social responsibility since its inception, which is why we have developed a special program under which we have been able to offer free learning projects to vulnerable people, students and many other listeners.

We are actively involved in women's economic empowerment projects, as well as collaborating and being actively involved in EU Woman and USAID programs.

In 2021, we conducted a variety of social activities, including the provision of various language development programs for women entrepreneurs and vulnerable groups.

A number of other social responsibility events are planned for this year.

Venera Kochlamazashvili

World2World - Director of Travel Agency

"I took a business English course in a language lab. At first I expected to study business terminology in English and apply it in practice. My expectations were met, I gained complex knowledge, as a result of which I was able to better negotiate with foreign partners and various companies, which ultimately helped me develop my business."

Mano Pachkoria

Career 8M - Founder and Director of Vocational Counseling and Employment Center

"I was expecting to learn with a standard program, but I found completely new approaches that made the language learning process easier. A simple, flexible and results-oriented program that absolutely meets modern challenges. A professional team creates the most friendly and comfortable environment. . "

Tamar Gavasheli

Founder and event manager of Bridal Design • Ori On Wedding.

"Within the framework of social responsibility, the language laboratory has given a business English course to women entrepreneurs.

Madonna (English teacher) is an amazing girl who with a short sense of humor and contagious positive energy opens up a conversation complex, barriers disappear somewhere and you involuntarily start talking.

I liked the structure of the book. With very practical and effective exercises.

I actively use the experience gained in my daily practice, which gives me more self-confidence. "

Diana Liparteliani

Information portal "Mkhare" - owner and editor-in-chief

I found myself in the "Language Laboratory" as part of the high social responsibility identified by the heads of the Language Center. At the center we found everything to be maximally focused on gaining new knowledge and practice. It was: a warm and comfortable environment, professional teachers, textbooks compiled according to the levels ... "
