The acronym is just one of the vast varieties of delightfully interesting features of English that you will learn with us at SEE Academy.

English Today

Viewed freely, the English language is the accretion and growth of every dialect, race, and range of time, and is both the free and compacted composition of all. — Walt Whitman

Over the past few decades English has emerged as the most widely spoken and used language in the world. Close to one billion people use English to communicate - either in writing or in speaking. According to the experts the number of words in the English language is over 10 million.

English is also the most commonly used language in the corporate business and the Information Technology (IT) sectors. Furthermore, all sectors of business and corporate industry view knowledge of English as an eminently desirable element for any job position. The most popular SMS and internet language is also English. These figures are currently steadily increasing. It is, therefore, indisputable that adequate knowledge of English is a definitive assurance of a comfortable and lucrative career. Contiguously, India has established itself as a country in which good, grammatical English is not only spoken, but also taught. The truly huge increase in the number of English based BPOs and call centres is clear evidence of this.
