Comment: I'm the only Thai in the language school, so I'm not good at all. Since I started enrolling, I like the peace of mind I get from the school, counseling and support. I like studying here because teachers are very determined to teach and learning content from basic to advanced is systematic. Classmates are friendly and help each other. I'm not a good student but everyone here makes me want to come to study every day. No pressure and no discomfort when I can't answer questions.
